

ABSTRACT

PEDICULAR HOOKS FOR RACHIDIAN ANCHORING DEVICE

5 The rachidian anchoring device with pedicular hooks
 (2, 4), permitting the emplacement and securement of a
 connecting rod (3) at the level of each vertebra (9) of a
 vertebral column, comprises particular hooks (2, 4)
 provided with securement means for the reception and
10 blocking of a transverse rod (5) connecting said pedicular
 hooks (2, 4) together and permitting exerting compression
 between the two pedicular hooks (2, 4) in the direction of
 the center of the vertebra (9).
